

XChange is our core module for stockbroking websites as well as QFIIs. XChange makes it possible for your company to target global investors in English. XChange is a custom tailored solution bringing dynamic market intelligence, features and functionality to enhance your own website, seamlessly. A customised XChange can include:

**CProfiles**

You will have the choice of dynamically selecting up to 25 CProfiles customised for your sub-site.

**CBIX**

News briefings from daily and other publications will be provided on your sub-site via RSS links

**Market Wrap**

Your wrap-up of the Chinese market will be provided in English on your sub-site

**Market Data / Quotes**

Stock quotes functionality and market indices will be provided in English on your sub-site

**Watchlists**

Clients are able to track their selection of Chinese stocks using the Watchlists module on your sub-site

**Research**

Your in-house research will be translated into English and made available on your sub-site

XChange is hosted by NewsnChina on scalable and secure servers residing in the USA.
